Abstract
This bibliography covers all articles in 13 leading management and international business journals in 1986 to 2003 (inclusive) that focus on Central and Eastern Europe. The database thus assembled is the basis for the contribution analysis in Meyer and Peng (2005): Probing Theoretically into Central and Eastern Europe: Transactions, Resources and Institutions, Journal of International Business Studies 36 (6), p. 600-621.

Table 1 provides a statistical overview on where and when studies on business in CEE were published. The bibliography lists articles by journals, starting with nine North American journals, followed by four European journals. The order is chronologically for each journal.
